PROJECTS

DarkNest – Dark Web & Cybersecurity Awareness Platform
Solo Project
Tech Stack: HTML, CSS (Tailwind), JavaScript
DarkNest is a space-themed responsive web application aimed at educating users about the dark web and cyber threats. The project covers over ten key topics including online safety, anonymous networks, and law enforcement. It features animated sections and interactive layouts, designed and deployed independently to demonstrate frontend development proficiency.

BudgetBuddy – Personal Finance Tracker
Group Project — Role: Frontend and Backend Developer
Tech Stack: Python, Streamlit, SQLite, Pandas, Seaborn
BudgetBuddy is a full-featured expense tracking app that allows users to log personal expenditures, manage peer-to-peer transactions, and visualize financial summaries. I worked on both the frontend interface and backend logic, contributing features such as secure user authentication, password reset, real-time graphs, and CSV export. The interface was designed for accessibility using custom Streamlit styling.
